

Antony Garrett Lisi

Quotes

*Beautiful, Thinking, Motivation, Inspiration, Physics, Want, People, Capacity,
Unusual, Mind, Ninety, Surfing, My Time, Gravity, Lasts, Found, Doe, Path,
Feels, Academia*

I think the universe is pure geometry - basically, a beautiful shape twisting around and dancing over space-time.

~Antony Garrett Lisi

The mathematics of quantum mechanics very accurately describes how our universe works. And it tells us our reality is continually branching into different possibilities, just like a coral.

~Antony Garrett Lisi

You cannot think when you're ecstatic.

~Antony Garrett Lisi

Everything that can happen, does. That's quantum mechanics. But this does not mean everything happens. The rest of physics is about describing what can happen and what can't.

~Antony Garrett Lisi

There are a lot of good things about string theory, and it's great that some people want to work on it.

~Antony Garrett Lisi

Yeah, I am a guy working on physics outside of academia. But I'm nowhere near Einstein's caliber.

~Antony Garrett Lisi

Math does come easily to me, but I was always much more interested in what theorems imply about the world than in proving them.

~Antony Garrett Lisi

Science is our last and greatest frontier.

~Antony Garrett Lisi

Ninety-five per cent of my time is virtually wasted.

~Antony Garrett Lisi

Coral is a very beautiful and unusual animal. Each coral head consists of thousand of individual polyps. These polyps are continually budding and branching into genetically identical neighbors.

~Antony Garrett Lisi

What physics tells us is that everything comes down to geometry and the interactions of elementary particles. And things can happen only if these interactions are perfectly balanced.

~Antony Garrett Lisi

It's hard to figure out the secrets of the universe when you're trying to figure out where you and your girlfriend are going to sleep next month.

~Antony Garrett Lisi

Deep down, everybody wants to do what they want to be doing. They just feel that they can't.

~Antony Garrett Lisi

I always found it satisfying that gravity was described by Einstein's geometric theory of general relativity.

~Antony Garrett Lisi

Surfing is simply the most fun I know how to have on this planet.

~Antony Garrett Lisi

I'm afraid the workings of J.J. Abrams' mind falls outside the predictive capacity of any coherent theory.

~Antony Garrett Lisi

The only thing that makes sense is if the universe is beautiful and simple and elegant.

~Antony Garrett Lisi

My friends are all geeks. And many of them are scientists who love

playing outside as much as I do.

~Antony Garrett Lisi

My father raised me to think independently and follow my own path in life.

~Antony Garrett Lisi
