Charles Scott Sherrington Quotes

Each waking day is a stage dominated for good or ill, comedy, farce, or tragedy, by a dramatis personae, the 'self', and so it will be until the curtain drops.

~Charles Scott Sherrington

Swiftly the head mass becomes an enchanted loom where millions of flashing shuttles weave a dissolving pattern, always a meaningful pattern though never an abiding one...

~Charles Scott Sherrington

As followers of natural science we know nothing of any relation between thoughts and the brain, except as a gross correlation in time and space.

~Charles Scott Sherrington

The brain is a mystery; it has been and still will be. How does the brain produce thoughts? That is the central question and we have still no answer to it.

~Charles Scott Sherrington

Natural knowledge has not forgone emotion. It has simply taken for itself new ground of emotion, under impulsion from and in sacrifice to that one of its 'values', Truth.

~Charles Scott Sherrington

The terminal path may, to distinguish it from internuncial common paths, be called the final common path. The motor nerve to a muscle is a collection of such final common paths.

~Charles Scott Sherrington

That a strong stimulus to such an afferent nerve, exciting most or all of its fibres, should in regard to a given muscle develop inhibition and excitation concurrently is not surprising.

~Charles Scott Sherrington

Charles Scott Sherrington Quotes

This integrative action in virtue of which the nervous system unifies from separate organs an animal possessing solidarity, an individual, is the problem before us.

~Charles Scott Sherrington

If it is mind that we are searching the brain, then we are supposing the brain to be much more than a telephone-exchange. We are supposing it to be a telephone-exchange along with subscribers as well.

~Charles Scott Sherrington

That our being should consist of two fundamental elements [physical and psychical] offers I suppose no greater inherent improbability than that it should rest on one only.

~Charles Scott Sherrington

Further study of central nervous action, however, finds central inhibition too extensive and ubiquitous to make it likely that it is confined solely to the taxis of antagonistic muscles.

~Charles Scott Sherrington

He solved at a stroke the great question of the direction of nerve-currents in their travel through brain and spinal cord.

~Charles Scott Sherrington
