Glasses, Home*

Life science research can be done on multiple platforms. Since we have a very small number of people flying into space, the more people you have, the better.

~Laurel Clark

Life continues in lots of places, and life is a magical thing.

~Laurel Clark

There was a moth in there, and it still had its wings crumpled up, and it was just starting to pump its wings up. Life continues in lots of places, and life is a magical thing.

~Laurel Clark

If you're trying to get someone who's sick with a fever off of a submarine and it's cold and raining outside, the only way in and out of a submarine, generally, is through a fairly narrow hatch.

~Laurel Clark

Whenever I do get to look out, it is glorious. Even the stars have a special brightness.

~Laurel Clark

Gravity is one variable in a lot of scientific processes. If you can remove gravity or minimize its effect, then you can understand the other processes that are going on.

~Laurel Clark

As a physician, I understand how important it is to collect data on people so we can understand what's happening with them. I will be in the position to help enable that knowledge.

~Laurel Clark

The microgravity or the very, very low amount of gravity that we have up in space forces some changes in different processes. It forces

changes in us as human beings.

~Laurel Clark

Science, for hundreds of years, has spanned the differences between cultures and between countries.

~Laurel Clark

Hello from above our magnificent planet Earth.

~Laurel Clark

There are some very significant changes in the way the fluids are distributed in our body, the way our heart functions initially, and as well as our bone and muscle.

~Laurel Clark

There's a lot of different things that we do during life that could personally harm us and I choose not to stop doing those things.

~Laurel Clark

Certainly my parents were a huge influence. They always expected the most out of all of us. And expected us to do our very best. I'm thankful to them for allowing me to do what I wanted to do.

~Laurel Clark

Everyone that I've talked to who's been to space has thoroughly enjoyed the experience, and what you often hear them say is: It was great, but we just had to come home.

~Laurel Clark
