Ideas, Typical, Knows, Safety, Age, Aggravation, School, Application, Looks,
Should, Ethical*

I think we should put the same weight now on the co-factors as we have on HIV.

~Luc Montagnier

It's clear that prevention will never be sufficient. That's why we need a vaccine that will be safe.

~Luc Montagnier

Basic research is very useful, but it should be more geared toward application than it was before.

~Luc Montagnier

We don't know why, but there are some gradients of infection.

~Luc Montagnier

The idea of the live-virus vaccine is to produce in a continuous way some viral antigens.

~Luc Montagnier

AIDS does not inevitably lead to death, especially if you suppress the co-factors that support the disease. It is very important to tell this to people who are infected.

~Luc Montagnier

Our goal is not to completely eradicate the infection - that would be very difficult - but to produce a vaccine that will prevent not infection but disease. I think this is more possible.

~Luc Montagnier

I've participated in meetings where there were concerns by ethical experts. There is no clear solution.

~Luc Montagnier

AIDS will be our first priority, but in two years' time we don't know

where AIDS research will stand, so we are also thinking of activity on other diseases.

~Luc Montagnier

Psychological factors are critical in supporting immune function. If you suppress this psychological support by telling someone he's condemned to die, your words alone will have condemned him.

~Luc Montagnier

We can be exposed to HIV many times without being chronically infected. Our immune system will get rid of the virus within a few weeks, if you have a good immune system.

~Luc Montagnier

That is why it is so important not only to have excellent treatment but also to try to get back the immune defense, because there you have a natural defense that takes place everywhere.

~Luc Montagnier

It's easier to learn things for life by the age of 12 and not the age of 18. This is just my guess.

~Luc Montagnier

Since most of the transmission is sexual transmission, you have a regional or local response to the virus.

~Luc Montagnier

Its very difficult in our society. You cannot impose certain behavioral changes. Education can do it at the right time, probably by high school. After that it is too late.

~Luc Montagnier

The center will be fully operational in two years' time, but probably in the middle of the year we will have a temporary laboratory of 4,000

square feet.

~Luc Montagnier
