

Phil Plait Quotes

*Stars, People, Ignorance, Universe, Inspiration, Dinosaurs, Tired, Moon,
Humanity, Thinking, Nonsense, Viruses, Connections, Afterlife, Reality, Real,
Blue, Wonder, Stuff, Kids*

Pseudoscience is like a virus. At low levels, it's no big deal, but when it reaches a certain threshold it becomes sickening.

~Phil Plait

I'm tired of ignorance held up as inspiration, where vicious anti-intellectualism is considered a positive trait, and where uninformed opinion is displayed as fact.

~Phil Plait

Teach a man to reason and he will think for a lifetime.

~Phil Plait

The difference between the dinosaurs and us is that we have a space program and we can vote...

~Phil Plait

However, science isn't just about showing when you're right; it's also about showing when you're wrong.

~Phil Plait

The Universe is cool enough without making up crap about it.

~Phil Plait

Humanity and life are reflected in the stars, and the Universe itself is poetry.

~Phil Plait

Other job markets may lay claim to the title, but astronomy is actually the world's oldest profession.

~Phil Plait

I still hear some people say that science takes the wonder out of life. Those people are utterly wrong. Science takes us to the wonder

~Phil Plait

I'm tired of ignorance held up as inspiration.

~Phil Plait

Just like people, stars can be important without being terribly bright.

~Phil Plait

They say that even the brightest star won't shine forever. But in fact, the brightest star would live the shortest amount of time. Feel free to extract whatever life lesson you want from that.

~Phil Plait

Welcome to science. You're gonna like it here.

~Phil Plait

Sometimes, even by accident, the universe makes beauty, and we can stand back in awe of it. Even better - we can figure out why. Science! I love this stuff.

~Phil Plait

Some people try to tell me that science will never answer the big questions we have in life. To them I say: baloney! The real problem is your questions aren't big enough.

~Phil Plait

Not everything that's cool is science, but everything in science is cool.

~Phil Plait

Sixty-five million years ago the dinosaurs had a bad day.

~Phil Plait

When you're dealing with the universe, ignorance can be deadly.

~Phil Plait
