

Robert Lanza

Quotes

*Reality, Space, Consciousness, Law, Animal, Thinking, Existence, Views,
Mean, Physics, Different, Together, Way, Cells, Linear, Technology, Mind,
Blood, Essentials, Bangs*

Death is simply a break in our linear stream of consciousness.

~Robert Lanza

Nothing has existence unless you, I, or some living creature perceives it, and how it is perceived further influences that reality. Even time itself is not exempted from biocentrism.

~Robert Lanza

Religion and science look at reality differently.

~Robert Lanza

The laws of nature are structured so that we grow and change, and get to experience the full spectrum of biological existence.

~Robert Lanza

Time is not an absolute reality but an aspect of our consciousness.

~Robert Lanza

Modern science cannot explain why the laws of physics are exactly balanced for animal life to exist.

~Robert Lanza

Without consciousness, space and time are nothing.

~Robert Lanza

That's absolutely correct and in addition to that life just isn't an accident of the laws of physics. There's a long list of experiments that suggest just the opposite.

~Robert Lanza

We don't have time to wait for President Bush to change his mind. How many breakthroughs have been missed as a result of this policy?

~Robert Lanza

Our linear concept of time means nothing to nature.

~Robert Lanza

We take for granted how our mind puts everything together.

~Robert Lanza

Physics tells us observations can't be predicted absolutely. Rather, there's a range of possible observations each with a different probability.

~Robert Lanza

In whatever form it takes, life sings because it has a song. The meaning is in the lyrics.

~Robert Lanza

We have failed to protect science against speculative extensions of nature, continuing to assign physical and mathematical properties to hypothetical entities beyond what is observable in nature.

~Robert Lanza

I do not think that there is a reputable scientist on this planet who would advocate using this technology to generate a human child as was just announced.

~Robert Lanza

Reality is observer-determined - it's a spatio-temporal process, which fortunately means that things must change.

~Robert Lanza

Until we recognize the essential role of biology, our attempts to truly unify the universe will remain a train to nowhere.

~Robert Lanza

Any universe that could have preceded consciousness only existed in a

probability state.

~Robert Lanza

Amazingly when you add life and consciousness to the equation you can actually explain some of the biggest puzzles of science.

~Robert Lanza

For example, if the big bang had been one-part-in-a billion more powerful, it would have rushed out too fast for the galaxies to form and for life to begin.
