## Quotes

*Water, Nature, Air, Blood, Needs, Men, Earth, Energy, Thinking, War, Humanity,  
Spring, Years, Balance, Copies, Ignorant, Uprising, Media, Looks, Believe*

I think it would have been much better if Newton had contemplated how the apple got up there in the first place!

~Viktor Schauberger

A fish does not swim it is SWUM. A bird does not FLY it is flown.

~Viktor Schauberger

The true foundation of all culture is the knowledge and understanding of water.

~Viktor Schauberger

You must learn to think one octave higher. Only then will you learn how implosion energy works.

~Viktor Schauberger

More energy is encapsulated in every drop of good spring water than an average-sized PowerStation is presently able to produce.

~Viktor Schauberger

Even in earliest youth my fondest desire was to understand Nature, and thus to come closer to the truth; a truth that I was unable to discover either at school or in church.

~Viktor Schauberger

Everything is governed by one law. A human being is a microcosmos, i.e. the laws prevailing in the cosmos also operate in the minutest space of the human being.

~Viktor Schauberger

Actually, the mysteries of water are similar to those of the blood in the human body. In Nature, normal functions are fulfilled by water just as blood provides many important functions for mankind.

~Viktor Schauberger

Equivalence signifies uniformity and thus immobility.

~Viktor Schauberger

We need no science of formulae, but a science of forms.

~Viktor Schauberger

In every case do the opposite to whatever technology does today. Then you will always be on the right track.

~Viktor Schauberger

Implosion is no invention in the conventional sense, but rather the renaissance of ancient knowledge, lost over the course of time.

~Viktor Schauberger

You must look at the processes of motion in the macrocosmos and microcosmos accurately, and copy them!

~Viktor Schauberger

For a person who lives 100 years in the future, the present comes as no surprise.

~Viktor Schauberger

The scientist states that pressure is exerted outwards in all directions equally, whereas natural pressure (e.g. air pressure) is exerted inwards from all directions equally.

~Viktor Schauberger
